Zero Friction Enterprise™

Helping Enterprises Achieve Infinite
Momentum by Removing Friction
Across the Estate

[Know More](#)

We are a global technology and business process services company empowering enterprises to turn the friction between intent and impact into *speed*.

Build

Design, build, and market digital products, platforms, and applications that create the experiences your customers want

Optimize

Enhance business outcomes through process optimization

Transform

Turn the friction between legacy and what's next into modernization at speed and scale, backed by actionable insights

Run

Strip the drag out of your IT landscape, boosting efficiency and lowering costs

About Us

Our Purpose

To create smiles through great people and technology

▶ Learn more: [Watch the video](#)

Our Vision

To be the world’s most loved digital transformation partner

▶ Learn more: [Watch the video](#)

Our Values

Put People First

Happy, engaged employees are more productive, creative, and collaborative. We put our people first because it’s the right thing to do and it enables them to create better solutions for our customers.

Create Customer Value

As a trusted partner, we consistently surpass expectations and find ways to create more value for our customers to help their businesses grow and thrive.

Innovate Relentlessly

We’re technology-loving people who push boundaries and seek change to bring the future into the present. We stay curious and continually find new ways to solve problems for our customers.

Be Sustainable

We integrate sustainability into everything we do and collaborate with our stakeholders to build a better tomorrow.

Come On In!

We ensure that everyone we interact with feels welcome, safe, and informed. In everything we do, we respect and value people—including our employees, customers, partners, and members of the communities we serve.

About Us

Zero Friction Enterprise™

Helping Enterprises
Achieve Infinite
Momentum
by Removing Friction
Across the Estate

Zero Friction, Infinite Momentum.

Know More

Each pillar drives one kind of friction to zero.
Together, they form the Zero Friction operating model.

Zero Tech Debt

We modernize aging code and legacy systems so technical debt stops compounding, keeping every application ready for what's next.

Zero Vulnerability

We build identity-first, zero-trust security into every layer, so vulnerabilities are caught and closed before they become incidents.

Zero Backlog

We pair AI-led engineering with human oversight to clear delivery backlogs faster, so teams spend less time waiting and more time building.

Zero Tickets

We use AIOps and intelligent service operations to resolve issues before users ever notice them, so support tickets stop piling up.

Zero Defects

We bring AI-led quality engineering into every stage of development, catching defects early so they never reach production.

Zero License

We transform licensed applications into fit-for-purpose cloud-native or Agentic AI solutions, freeing enterprises from vendor lock-in.

Powered by Zerovity™,
our AI Delivery Layer.

Creating Smiles for Our Customers

The partnership with Hexaware is to really help us extend our strategic point of view and figure out how to appropriately execute on our strategic journey we're embarking on. It's been a great experience over the last two years.

JOHN MCCORRY
Chief Information Officer
Airlines Reporting Corporation (ARC)

If I have to say one thing about Hexaware, it is the fact that this partner in trials and tribulations has stood with me. Despite the complex problems that I have given them, they have stood with us and taken the heat, and still, they are standing right next to me, and they have helped us succeed throughout. They are an excellent partner, especially in emerging technologies and digital technologies like IoT, smart factory, AR VR, supplier collaboration, and gen AI.

KRIS RAO
Chief Information and Digital Officer
HNI Corporation

Hexaware has been a great partner. We operate in 120 countries and have a lot of complex projects. We serve a large spectrum of clients, from large enterprises to small businesses. So, the breadth and depth of the businesses is wide and varied. Hexaware's engagement has been critical in enabling us to serve our customers better. They continue to play an important role in our 3X3 transformation.

ABDUL RAZACK
Global Head of Product & Engineering
Aon Plc

For us, Hexaware has been a key partner in allowing us to focus on the areas that are the highest value priorities. Given the limited number of resources we have, Hexaware can step in and assist with the important day-to-day work, allowing us to advance projects much more quickly with the resources we have.

BERT ODINET
SVP and Chief Innovation Officer
Freeport-McMoRan

Zero License

Zero Defects

Zero Vulnerability

Creating Smiles Across the Zero Friction Enterprise™

We help enterprises **remove the friction** holding technology, security, and delivery back — pillar by pillar, wherever it's costing you the most.

Zero Tech Debt

Modernize legacy code and systems before they become tomorrow's outage

Zero Backlog

Turn a growing queue of delivery work into work that actually ships

Zero Defects

Catch quality issues in development, not in production

Zero Vulnerability

Close security gaps before they become headlines

Zero Tickets

Stop firefighting the same issues, resolve them before users notice

Zero License

Break free of vendor lock-in and rising renewal costs for good

Powered by Zerovity™, our AI Delivery Layer.

Zero Tech Debt

Retiring and preventing technical debt

THE PROBLEM

- Legacy platform constraints undocumented code and integrations
- Hidden dependencies buried in aging codebases
- Slow release cycles that increase change risk
- Rising maintenance effort that crowds out innovation

THE AI-ENABLED APPROACH

- AI discovers dependencies and extracts business logic automatically
- AI prioritizes modernization targets by impact and feasibility
- AI assists code refactoring, re-platforming, and migration
- Delivered modernization factories, and architecture governance

MEASURABLE OUTCOMES

 Change risk
Reduced

 Modernization velocity
Faster

 Maintenance effort
Lower

 Scalability
Improved

Zero Tech Debt

Case study: A North American Retail and Commercial Bank

Modernizing Legacy Banking Systems Without the Disruption

- Modernized legacy CICS and aging .NET systems while protecting quality, compliance, and business continuity in a tightly regulated environment.
- Implemented a multi-agent SDLC model with planner, executor, and reviewer agents to guide the modernization.
- Automated COBOL copybook parsing, business logic extraction, and field mapping generation.
- Generated Angular UI and .NET APIs through AI-driven code automation, with human-in-the-loop checkpoints at every stage.

98%
reduction in
migration time

75%
decrease in post-
migration defects

60%
reduction in manual
effort

Zero Vulnerability

Proactive risk reduction

THE PROBLEM

- Growing vulnerability backlogs that outpace remediation capacity
- Delayed patching across distributed cloud and legacy estates
- Inconsistent security controls across environments
- Audit exposure from unresolved, unprioritized risk

THE AI-ENABLED APPROACH

- AI prioritizes vulnerabilities by exploitability and business impact
- AI weighs asset criticality and remediation urgency for sequencing
- Automated remediation workflows close threats before they open
- Secure by design engineering and zero trust aligned controls throughout

MEASURABLE OUTCOMES

 Exposure windows
Shorter

 Compliance posture
Stronger

 Unresolved critical vulns
Fewer

Zero Vulnerability

Case study: A Leading Home Mortgage Company

Detecting Real Threats Faster With AI-Assisted Security Operations

- Addressed security operations spanning identity and access management, vulnerability management, governance and risk compliance, third-party risk, extended detection and response, email perimeter defense, dark web monitoring, and single sign-on.
- Deployed AI-driven threat detection with advanced correlation and noise reduction to separate real threats from alert noise.
- Automated triage and enrichment to prepare investigation-ready incident packages before analysts ever open a ticket.

12x
faster triage

90%
reduction in false
positives

9x

Zero Backlog

Accelerating value flow

THE PROBLEM

- Demand queues and unclear requirements delaying prioritization
- Aging technical fixes stuck behind capacity constraints
- Modernization work waiting behind higher-visibility initiatives
- Ideas losing business relevance while queued

THE AI-ENABLED APPROACH

- AI classifies demand and enriches requirements automatically
- AI assesses impact and recommends prioritization sequencing
- AI generates execution-ready stories and automates delivery prep
- Delivered via Zerovity, AI-assisted SDLC, and backlog intelligence agents

Zero Defects

Preventing quality issues before they reach production

THE PROBLEM

- Recurring defects surfacing late in the release cycle
- Manual testing that can't keep pace with delivery speed
- Inconsistent quality gates across teams and pipelines
- Rework and hotfixes consuming scarce engineering capacity

THE AI-ENABLED APPROACH

- AI generates and maintains test cases from code and requirements
- AI-driven static analysis catches defects before they reach QA
- Predictive quality scoring flags high-risk changes pre-release
- Delivered via Zerovity, AI-assisted SDLC, and automated quality gates

Insurance

Case study: Leading Global Insurance & Reinsurance Broker

Driving Enterprise AI Transformation with an Intelligent Broker Copilot

- Built a broker copilot to transform the pre-bind broking value chain — from submission ingestion to quote comparison and coverage mapping
- Deployed an email intent agent to automatically identify relevant carrier emails, extract attachments, and tag documents in the ECM platform,
- Implemented a quote data extraction agent powered by Azure OpenAI and Document Intelligence to extract 160 configurable data points from unstructured documents
- Enabled human-in-the-loop validation, allowing brokers to review and refine extracted data
- Integrated AI-driven quote comparator and coverage map generator agents to deliver instant quote comparisons and graphical coverage insights
- Established AI CoE, MLOps, DevSecOps pipelines, and scalable cloud infrastructure to support multi-year, multi-geography expansion and bi-annual major releases

Life Sciences

Case study: Global clinical research organization

Co-engineering the World's Largest Health Cloud with Amaze®

- Co-engineered health cloud by integrating Microsoft, Amaze®, and third-party tools
- Successfully migrated 98% of workload to Snowflake and Cloud Era
- Deployed cloud environments for healthcare data analysis, focused on clinical trials, population health, real-world evidence, pre and post-launch, and patient-reported outcomes
- 20 petabytes processing on cloud (Patient, Commercial, Real-world, Genomics)
- 75% reduction in resources needed for processing per region
- 90% reduction in country-level analytics processing time (from 4 or 5 weeks to a few hours)

Professional Services

Case study: Global Law Firm

Enabling Regulatory Compliance and Risk Reduction via Azure-Based Decoupling

- Assessed and decoupled global IT infrastructure to meet China data security and regulatory requirements
- Migrated APAC applications and data to a dedicated Azure environment to ensure compliance and local scalability
- Implemented logical and physical separation of identities, applications, and data across regions
- Designed disaster recovery, backup, and security controls to improve resilience and business continuity
- Delivered a unified user experience for attorneys and staff despite regional data isolation

25%

Reduction in total cost of ownership

Retail

Case study: American Midwestern Gas Station and Convenience Store Chain

Comprehensive Loyalty and Fresh-Food Ordering with Contactless Payments

- Expanded digital service availability across 400 locations, delivered by designing and launching an end-to-end platform unifying contactless fuel payment, mobile loyalty, and order-ahead food services
- Maintained safe operations and increased in-store sales by enabling fully contactless transaction flows
- Increased convenience and eliminated pump exits, accomplished by implementing pay-from-car digital payments and remote pump activation integrated with site POS
- Boosted loyalty engagement and repeat visits by improving customer experience in retail through integrated mobile rewards and personalized, contactless ordering journeys
- Ensured food service continuity and faster, personalized orders by deploying an order-ahead solution with pizza customization integrated into kitchen systems and contactless collection points.

Corporate Overview

Services

Creating Smiles Across Services

We empower enterprises with a full spectrum of digital, technology, and operations services — enabling them to transform faster, perform better, and deliver superior experiences.

Artificial Intelligence

Amplify business value with responsible AI solutions

Cloud

Accelerate your journey, 2x faster than industry standard

Digital IT Operations

Run, secure, and optimize your digital backbone with our enhanced identity and security capabilities, strengthened by CyberSolve's AI-led expertise

Enterprise Platform Services

Build your business on the world's leading platforms

Business Process Services

Outsource, manage and automate business processes

Data & Analytics

Uncover business insights through the power of data & analytics

Digital & Software

Deliver powerful AI-led software solutions to your users

Global Capability Centers

Build with Hexaware's GCC 2.0, combining SMC Squared's GCC build-operate expertise and our platform-led IT delivery.

Anchor Responsible AI across Your Business Value Chain

Corporate Overview

Platforms

Power your business growth
and value realization **with our**
proprietary platforms

Zeroivity™: Our AI Delivery Layer

Understand every application. Modernize with confidence. Evolve on your own terms.

Zeroivity™ offers one connected view across infrastructure, operations, engineering, service, and business workflows — an agentic cognitive layer that gives clients a single command center to apply intelligence and improvements across the entire system.

Know More

What It Covers

Cognitive Application Maintenance & Support

AI-assisted maintenance backed by real application knowledge.

Legacy Modernization

Modernize with a clear, code-grounded understanding of what legacy applications actually do.

Zero License Transformation

Free applications from vendor lock-in with fit-for-purpose cloud-native or Agentic AI solutions.

Technology & Non-Functional Modernization

Migrate obsolete platforms forward without losing functionality.

Why Zeroivity™ is Not Just Another AI Tool

Extends What You've Already Built

Runs on top of AWS, Azure, or GCP, deepening your existing stack instead of replacing it. Bring your own IDE, coding agents, LLM, and repository.

Complete and Ready From Day 1

Code comprehension, knowledge graphs, and parser libraries ship ready to use, available as a platform or as standalone web services.

Grounded, Cited, and Auditable

Every answer is grounded in your actual repository and cited down to the file, line, and commit, audit-ready for regulated industries.

Amaze®: Accelerate Your Cloud Journey

- amaze®**
for Assessment

With a detailed transformation roadmap, you are prepared for each step of your cloud journey.
- amaze®**
for Modernization

Transform your legacy cloud data and apps to be ready for whatever tomorrow brings.
- amaze®**
for Migration

Enable systematic and efficient lift, tweak, and shift of your data and applications to the cloud.
- amaze®**
for ERP

Leverage an ERP cloud transformation platform to simplify adoption of new business models, mergers, and divestitures.

Tensai®: Automate Your IT Operations

Automate enterprise build and run operations across the three dimensions of **agility, efficiency, and experience**

tensai® for Agility

Amplify cost savings, reduce QA by 4x, and improve release velocity by 300% across your build, assurance, and release.

tensai® for Efficiency

Improve uptime, save on OpEx, reduce cloud spend, and automate tasks across your Cloud Ops, AIOps, and SecOps.

tensai® for Experience

Elevate user experience by 3x, manage user life cycle, self-heal, and self-service through bots and virtual assistants.

tensai® for GenAI

Drive innovation with Gen AI solutions, high-precision, secure knowledge systems, and executive assistance.

tensai® for Assurance

Power next-gen application delivery to release high-quality applications on time with cost efficiencies.

tensai® for Operations

Seamlessly integrate end-to-end automation, advanced data science, and bot management for optimized business processes.

AT-A-GLANCE

Outcome-based pricing

40%+ reduced incidents

40%+ cost savings via automation

400%+ ROI on standalone Automation-as-a-Service engagements

65%+ increase in processing of service requests

1,350+ bots deployed

1.2 Mn+ transactions processed per year

Security at the core

RapidX®: AI SDLC Framework

Transforming SDLC with Velocity, Quality, Governance, and Explainability.

Agentic Engineering Platform

Enterprise Context Integration

Combines your organization's coding standards, compliance rules, and architecture patterns with AI capabilities for tailored solutions.

KEY BENEFITS

- **Accelerated Delivery:** Achieve **60%-70% faster code comprehension**, **30%-55% faster code generation**, and **40%-55% faster code verification**.
- **96% reduction** in modernization time (4 days to 4 hours).
- **70% fewer defects** with automated validation.
- **35% productivity improvement** for assurance and release cycles.

Transparency & Governance:

Ensures audit trails, compliance enforcement, and quality gates at every stage of development.

Seamless Workflow:

From planning to deployment, RapidX® agents' spec-driven, parallel execution workflow enables verifiable, explainable AI outcomes.

Agentverse™ — One Unified Ecosystem

Three governed layers on a single platform — moving enterprise AI from pilot to production in weeks, not quarters.

LAYER 01
FOUNDATION

Agentverse™ Core
Secure, scalable AI landing zone for hybrid & multi-cloud.

Deployed in 4 weeks
Azure · AWS · NVIDIA · GCP

LAYER 02
WORKBENCHES

Agentverse™ Studios
Build, validate & operate agents — no SDK expertise needed.

Developer · Testing · Ops Studios
Drag-and-drop tools, AI-grade QA, full observability

LAYER 03
OUTCOMES

Agentverse™ Agents
600+ reusable, governed agents that deliver business outcomes.

600+ agents · 60% less dev time
6 categories, reusable enterprise-wide

Governance control plane — spanning every layer
RBAC · Centralized audit trails · RAI bias & drift checks · FinOps cost controls

100%
AI quality validated

Our Value Proposition

Why choose Hexaware?

Pioneering an AI-first Approach

At Hexaware, we've embraced an AI-first mindset, continuously innovating to ensure your transition to AI is seamless and successful.

Outcome-based Pricing

Our pricing models are outcome-oriented and demonstrate skin in the game with guaranteed benefits from Day 1

Proven Track Record of Digital Firsts

Our innovative, consulting-led services help customers fully leverage new-to-market and new-to-enterprise innovation and technology
